3. The Jigsaw Committee, in the first instance, will establish methods of procedure.

4. The Committee will prepare and maintain a program for the
production of intelligence on international communism designed to meet
the requirements of participating agencies and the national security.

It will recommend to the D/CI for IAC action, a precise delineation of
production responsibilities as between participating agencies, and will
adjudicate matters regarding priorities for production.

5. Allocations for production will follow the dominant interests
established in NSCID No. 3 and DCI 3/1, with such supplemental services
as should be rendered by the FBI due to its responsibilities in the
domestic field.

6. When the Jigsaw Committee discovers that there are gaps in
or unnecessary duplication of coverage or when the established allocations
of work are overlapping or not clearly defined, the Jigsaw Committee will
resolve the problem in so far as is possible in each case. If the problem
cannot be resolved satisfactorily by the Jigsaw Committee, it will be
referred, with appropriate recommendations, to the DCI, for consideration
by the IAC with FBI representation when appropriate.
